

Environmental Management Policy

DY Deokyang's corporate activities are in harmony with the environment and actively implement the following activities to establish and implement an environmental management system.

1. In addition to complying with environmental laws and regulations, we will continuously improve the level of water resource, air pollutant, and waste management by setting and implementing our own standards that are stronger than legal standards.
2. Respond to climate change by working to reduce greenhouse gases through accumulated experience and innovative technological development.
3. Strive to manage the environment by minimizing the use of raw materials, hazardous substances, and energy throughout the entire process from product design to production, use, and disposal, thereby preventing customer health and safety, local pollution accidents, and environmental pollution.
4. Strive to fulfill our corporate social responsibility through eco-friendly business activities.
